Product Retirements and Changes at Year's End

Y-Globe Valve Type 301

The Y-globe valve Type 301 is being retired December 31, 2015. The 5-series diaphragm valve is similar to the Y-globe valve in terms of function, plus it offers additional benefits regarding handling, safety and efficiency.

For that reason, the 5-series diaphragm valve is the perfect replacement for the Y-globe valve Type 301.

These are a few advantages of the 5-series diaphragm valve comparing to Type 301:

- Clearly improved flow rates
- Much higher variety of materials (valve body made of PVC, CPVC, ABS, PP, and PVDF, membranes made of EPDM, FPM, and PTFE)
- Better control valve due to the linear flow characteristics
- Various accessories

The Y-check valve Type 304 and the line strainer Type 306, which have some identical parts as Type 301, will still be available.

Last orders

All Y-globe valves Type 301 are available for ordering until December 31, 2015. If you plan to order these, please let me know your requested quantities as soon as possible, to ensure your valves will be available.

Spare parts

The spare parts will be available through 2016.

HydroKing® and FlameTech™ Vinyl Pipe

The HydroKing and FlameTech piping systems will retire at the end of 2015. Please submit any orders for these products before December 31, 2015.

Special Order Vinyl Products

The following items will be discontinued as standard stock products beginning January 1, 2016, but can be ordered as a special with minimum quantity requirements:

- Sch 120 PVC pipe
- SDR 13.5, 21, 26, 41 PVC pipe
- PVC grey rectangular bar

The following items are currently available in multiple lengths but beginning January 1, 2016, will only be available in 5 foot lengths. Other lengths will no longer be stock items but can be ordered as a special with minimum quantity requirements.

- 2½" to 10" PVC grey solid bar
- Square PVC grey bar
- PVC round clear rod
- CPVC hollow only 5 foot length
- PVC grey hollow bar
